Title: Digital euro - Offline solution

Description: The current procurement procedure focuses on a solution to make offline digital euro payments available to users and merchants across Europe. The ability to pay offline, with no third party involved in the transaction is a key feature of the digital euro, both for resilience and privacy purposes. The ECB is looking to acquire an end-to-end solution, including full rights to use, modify and redistribute among the participating intermediaries. The solution will need to enable instant and final settlement, consecutive offline payments, the ability to pay in proximity in P2P or POS scenarios and include the possibility to fund and defund online (via a smartphone) or at an ATM, also using cash. The services of the contract resulting from this procurement are intended to cover the development, including maintenance, as well as the operation of the Offline Solution component. The development refers to the design, definition and implementation (incl. testing) of the component and its integration into the overall digital euro architecture as part of the Digital Euro service platform (DESP). The operation of the component includes the hosting and running of the set of functions and activities within the scope of the component, including the provision of a service desk dedicated to the monitoring and resolution of any component related operational, functional, or technical issues, both during normal and abnormal situations.

5.1.1. Purpose

Main nature of the contract: Services

Main classification (cpv): 66110000 Banking services

Additional classification (cpv): 72000000

IT services: consulting, software development, Internet and support

Options:

Description of the options: The initial contract duration is 4 years with the possibility of one or more optional extensions to a total maximum contract duration of 15 years. This duration is justified by the following high-level summary: Due to the complexity and volume of the project, it will be not possible to deliver all services within 4 years. Specifically for the digital euro, where the contracts shall cover both development and operations, with development timeframes being in the range of typically around 2 years, followed by a staggered roll-out of the different use cases, the standard 4 years contract duration is considered inadequate to ensure that any provider would even be in a position to carry out the development and then ensure a stable operation of any of procured components. Fifteen year duration is expected to allow a development and rollout of the complete digital euro, including all use cases and allow the respective provider to be available for support and maintenance in the time period where the digital euro would increase the number of users. Following current estimations and market research, after the 4 year standard contract, the ramp up phase just began and only a fraction of the potential end user will be onboarded on the Digital Euro Service Platform, but with the amount of new end user per day peaking. Underlining the strong need for a stable support and maintenance during this time. Also, this approach allows the project team to focus on the digital euro functionality while avoiding any change of suppliers in this critical phase. This justification will be verified when the decision on the extension is taken. If the good reasons that had justified the reservation in the contract notice and in the procurement documents no longer exists - no contract extension will be requested.

5.1.2. Place of performance

Anywhere in the European Economic Area

5.1.3. Estimated duration

Duration: 4 Years

5.1.5. Value

Estimated value excluding VAT: 220 700 000,00 EUR

Maximum value of the framework agreement: 662 100 000,00 EUR

5.1.6. General information

Procurement Project not financed with EU Funds.

The procurement is covered by the Government Procurement Agreement (GPA): no

Additional information: In deviation from Article 30 (1) of the Decision ECB/2016/2 laying down the rules on procurement (as amended), (available at <https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:02016D0002-20200501>), participation in this procurement procedure is subject to the following place of establishment and control requirement: Only the following may be eligible as candidates, tenderers, members of a temporary grouping or sub-contractors: - EU Nationals that - are controlled by EU Nationals. Should candidates, tenderers or members of a temporary grouping that do not fulfil these requirements apply/submit an application, the application/tender will be excluded. Should sub-contractors be proposed that do not fulfil these requirements (i.e. being an EU National being controlled by an EU National), the ECB will either decide to exclude the application/tender or request that the sub-contractor be replaced with a sub-contractor that does fulfil the requirements. An 'EU National' means any legal entity

with registered offices in an EU member state or any natural person that has the nationality of an EU member state. 'Control' means the ability to exercise a decisive influence on an undertaking, directly, or indirectly through one or more intermediate undertakings. Control can take any of the following forms: (i) the direct or indirect holding of more than 50% of the nominal value of the issued share capital in the legal entity concerned, or of a majority of the voting rights of the shareholders or associates of that entity, (ii) the direct or indirect holding, in fact or in law, of decision-making powers in the legal entity concerned. The contractors must moreover ensure that any cooperation with Nationals of third countries (non-EU countries) or that are controlled by such a country and/or by a national of such a country does not affect the security interests and avoids potential negative effects over security of supply of inputs that are critical to the procurement and the procurement subject. As proof, Candidates shall submit a declaration(s) in the Annex CfA4 for themselves and potential members of temporary groups or subcontractors. The ECB reserves the right to request further information or proof in this context to assess, if the above requirements are fulfilled. ----- Information on the contract award notice: the name of the second-ranked successful tenderer will be announced in a subsequent publication of a contract award change notice which will indicatively take place by mid-October 2025 as soon as the framework agreement has been signed.
