Title: Digital euro - Alias Lookup

Description: The success of the digital euro will depend on the ability of end-users to make payments in a way that is simple and accessible to them. For this purpose, end-users must also be able to pay and be paid in digital euros through an account alias (e.g. an account number, a phone number or an email address) without necessarily knowing the details of the Payment Service Provider (PSP) of the other end-user to be paid or pay. In this context, using an alias can be considered a more user-friendly method than using a traditional account number. To achieve this goal, the component will be composed of two different functions: - the setup and maintenance of a DEAN mapping table and lookup service which will link the Digital Euro Account Number (DEAN) of an end-user with a specific Payment Service Provider. This mapping shall be used for the purpose of allowing end-users to trigger a payment without knowing the PSP of the other end-user, so their PSP can route the payment to the correct beneficiary before settlement occurs. - the availability of this mapping table will allow the DESP to lookup for the relevant PSP associated to the DEAN informed by the End User and to fill in the payment message accordingly as such information is needed for the settlement of the payment request. The setup and maintenance of an Alias mapping table and lookup service which will link the proxy that identifies an End User (e.g. phone number or an email address) with a specific PSP. This mapping shall be used for the purpose of allowing end-users to

trigger a payment without knowing the DEAN of the other end-user. The availability of this service will allow PSPs to validate whether an alias used by an End user when initiating a payment is valid i.e. exists and it is active in DESP. Using aliases instead of account details improves the user experience for peer-to-peer (P2P) money transfers, requires less data and reduces the risks of fraud. The need to develop such a feature for the digital euro will therefore play an important role in its acceptance by users, and hence its ultimate success.

Additional classification (cpv): 72000000

IT services: consulting, software development, Internet and support

Options:

Description of the options: The initial contract duration is 4 years with the possibility of one or more optional extensions to a total maximum contract duration of 10 years. This duration is justified by the following high-level summary: Due to the complexity and volume of the project, it will be not possible to deliver all services within 4 years. Specifically for the digital euro, where the contracts shall cover both development and operations, with development timeframes being in the range of typically around 2 years, followed by a staggered roll-out of the different use cases, the standard 4 years contract duration is considered inadequate to ensure that any provider would even be in a position to carry out the development and then ensure a stable operation of any of procured components. Ten year duration is expected to allow a development and rollout of the complete digital euro, including all use cases and allow the respective provider to be available for support and maintenance in the time period where the digital euro would increase the number of users. Following current estimations and market research, after the 4 year standard contract, the ramp up phase just began and only a fraction of the potential end user will be onboarded on the Digital Euro Service Platform, but with the amount of new end user per day peaking. Underlining the strong need for a stable support and maintenance during this time. Also, this approach allows the project team to focus on the digital euro functionality while avoiding any change of suppliers in this critical phase. This justification will be verified when the decision on the extension is taken. If the good reasons that had justified the reservation in the contract notice and in the procurement documents no longer exists - no contract extension will be requested.

5.1.6. General information

Procurement Project not financed with EU Funds.

The procurement is covered by the Government Procurement Agreement (GPA): no

Additional information: In deviation from Article 30 (1) of the Decision ECB/2016/2 laying down the rules on procurement (as amended), (available at <https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX:02016D0002-20200501>), participation in this procurement procedure is

subject to the following place of establishment and control requirement: Only the following may be eligible as candidates, tenderers, members of a temporary grouping or sub-contractors: - EU Nationals that - are controlled by EU Nationals. Should candidates, tenderers or members of a temporary grouping that do not fulfil these requirements apply/submit an application, the application/tender will be excluded. Should sub-contractors be proposed that do not fulfil these requirements (i.e. being an EU National being controlled by an EU National), the ECB will either decide to exclude the application/tender or request that the sub-contractor be replaced with a sub-contractor that does fulfil the requirements. An 'EU National' means any legal entity with registered offices in an EU member state or any natural person that has the nationality of an EU member state. 'Control' means the ability to exercise a decisive influence on an undertaking, directly, or indirectly through one or more intermediate undertakings. Control can take any of the following forms: (i) the direct or indirect holding of more than 50% of the nominal value of the issued share capital in the legal entity concerned, or of a majority of the voting rights of the shareholders or associates of that entity, (ii) the direct or indirect holding, in fact or in law, of decision-making powers in the legal entity concerned. The contractors must moreover ensure that any cooperation with Nationals of third countries (non-EU countries) or that are controlled by such a country and/or by a national of such a country does not affect the security interests and avoids potential negative effects over security of supply of inputs that are critical to the procurement and the procurement subject. As proof, Candidates shall submit a declaration(s) in the Annex CfA4 for themselves and potential members of temporary groups or subcontractors. The ECB reserves the right to request further information or proof in this context to assess, if the above requirements are fulfilled.
